# Sergey Khorkov

**Date of birth:** 20.09.1990
**Nationality:** Russian
**Phone number:** +79852121448
**Email address:** srg.khorkov@yandex.ru
**Telegram:** @S_Khkv
**Positions of Interest:** Head of Product, Project Manager

## Profile

Product manager with experience building digital platforms and products in business and cloud environments.
Experienced in product metrics, customer journeys, platform development and cross-functional delivery across engineering and business teams.
Background in cloud platforms, developer platforms and large-scale digital transformation initiatives.

## Work experience

01/2026 – present
Moscow, Russia

### Digital Transformation Lead
**SIBUR**

- **Managing projects** focused on automation and improvement of key IT processes, including **procurement, budgeting, infrastructure provisioning, system design and project management** processes
- Implementing **Jira and Confluence** as a unified platform for managing products, projects and operational tasks
- Launching **Task & Process Mining** tools to analyze workflows and identify operational inefficiencies
- Developing **SAP-based** digital solutions to automate **procurement** and internal operational processes
- Building **KPI dashboards** and **performance metrics (FineBI based)** to track project execution and operational efficiency

06/2024 – 12/2025
Moscow, Russia

### Product Lead: Cloud Platform
**Beeline Cloud**

- Led **business development and product growth** of a cloud platform generating **$60M+ annual revenue**
- Defined product **strategy** and **development priorities** for the cloud platform including I**aaS, PaaS, SaaS and security services**
- Designed and implemented **product metrics** to monitor platform performance (QlikSense based), including **revenue** growth, product **adoption**, **active customers**, service **usage**, customer **acquisition** and **retention**
- Built **product P&L models** and **financial reporting** to track product profitability, costs and investment efficiency
- **Led a project to design and improve CJ's and onboarding** experience for cloud platform users
- Supporting development of a **self-service customer portal** enabling automated provisioning and management of cloud infrastructure
- Coordinating platform development across engineering, infrastructure, sales and marketing teams

01/2021 – 06/2024
Moscow, Russia

### Product manager: internal engineering platform
**Beeline**

**Led development of an internal engineering platform providing unified access to development tools, infrastructure services and product data for engineering teams.**

- Leading development of a platform **used by 100+ of product teams** and engineers (MAU 2500+ Users) to manage the technology production process
- Designing **self-serviceCJ's** for engineers, enabling faster access to **infrastructure, APIs and development tools**

## Work experience

- Implementing unified workflows supporting the full product lifecycle: **design, development, testing, deployment and production operations**
- Integrating **40+ engineering tools and services** into the Platform marketplace used by development teams (**Miro, Figma, Git, Jenkins, Harbor, CI/CD pipelines, Infrastructure environments, API gateway, Zabbix and other**)
- Enabling provisioning and management of **1268 development and production environments** through the platform
- Developing a centralized **catalog of products, applications and engineering assets** with automated data collection and ownership tracking
- Implementing platform capabilities to monitor product parameters, operational metrics and engineering workflows across teams
- Coordinating cross-functional development involving engineering, DevOps, infrastructure and platform teams

10/2019 – 01/2021
Moscow, Russia

### Lead of IT Operations
**Beeline**

- Implemented **SOX compliance processes** and internal controls for IT operations, ensuring adherence to financial and operational governance requirements
- Introduced systems for **time tracking, workload monitoring and resource planning** across engineering teams
- Established IT **budgeting and financial planning processes**, enabling cost control
- Implemented governance processes for **change management and source control** within software delivery
- Introduced a **Jira-based delivery framework** to manage project execution, backlog tracking and operational reporting
- Established a centralized model for **IT procurement and vendor engagement** supporting engineering and infrastructure teams

09/2017 – 10/2019
Moscow, Russia

### Senior financial analyst
**Beeline**

- Led **financial planning and investment analysis** for **IT and telecom network infrastructure projects**
- Performed **financial modeling, ROI and business case analysis** for large technology and network development initiatives
- Managed **budgeting and cost control for IT and network operations**
- Provided **strategic financial analysis and decision support to senior leadership**, including scenario modeling, investment prioritization and operational efficiency analysis
- Developed and maintained **financial reporting and performance dashboards** for IT and network functions, enabling transparency in CAPEX, OPEX and investment efficiency

12/2016 – 05/2016
Moscow, Russia

### Commercial Control Expert
**Tele2**

- Monitored and analyzed **key commercial KPIs** including **subscriber acquisition, churn rate, ARPU and revenue growth**, supporting performance management across regional business units
- Tracked **gross adds and net subscriber growth**, identifying drivers of **customer inflow and churn**
- Supported **target setting and performance control** for commercial teams, ensuring alignment between operational results and company revenue objectives
- Delivered **analytical reports and forecasting models** for subscriber base dynamics and commercial performance, enabling data-driven decisions by senior management

## Work experience

05/2012 – 12/2016
Moscow, Russia

### Project Financial Analyst
**NEC Corporation**

- Developed **financial models and business cases** for large-scale **telecom network deployment projects**, including infrastructure construction and equipment supply
- Performed **project financial planning and cost estimation** for telecom operators
- Monitored **project financial performance (revenue, costs, margins)** throughout the project lifecycle, ensuring adherence to budget and profitability targets
- Supported **commercial proposals and tender processes**, preparing pricing models and financial justifications
- Analyzed **CAPEX requirements, project risks and profitability scenarios**

04/2011 – 05/2012
Moscow

### Contract Support Specialist
**Huawei**

- Supported **contract administration and procurement operations**, coordinating documentation and approval of contractual terms with suppliers and internal stakeholders
- Managed **primary procurement and logistics documentation**
- Coordinated **contract execution and delivery processes**, working with procurement, logistics and finance teams

## Education

08/2021 – 03/2022
Moscow, Russia

### Management
**INSEAD & Higher School of Economics**

Leadership program focused on accelerating senior managers' capabilities in **strategic leadership, decision-making, organizational transformation and leading large-scale change initiatives**.

09/2008 – 07/2012
Moscow, Russia

### Accounting, Analysis and Audit | Bachelor's Degree in Accounting, Analysis and Audit
**Financial University under the Government of the Russian Federation**

06/2005 – 09/2008
Moscow, Russia

### Finance and Law | College Diploma
**Financial University under the Government of the Russian Federation**

Diploma with honor

## Skills

- Product Management
- Project Management
- Data-Driven Product Management
- Financial Modeling & Product P&L
- Technical Program Management
- API Platforms

## Social Media
